

Light Gauge Steel Floor Trusses

Using the revolutionary MiTek Industries Ultra-Span® system, our floor trusses can be engineered, pre-fabricated and installed to your specifications. In addition, our product will meet the non-combustible building code requirement and in most cases eliminate the need for installing sprinklers within the floor. In some cases, corrugated steel can be attached directly onto the pre-fabricated floor truss, creating a floor panel.

Our Benefits

- Meets fire code requirements calling for non-combustible materials
- May eliminate sprinklers in the floor system
- Open web design allows mechanical, plumbing and electrical equipment to be run through the trusses
- Top cord or bottom cord bearing
- Prefabricated in a controlled environment thus ensuring the highest level of quality.

Engineering

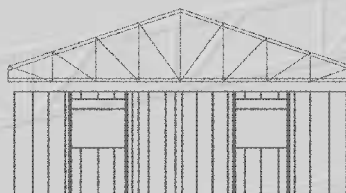

Superior Truss is your full-service manufacturer. We offer a wealth of benefits and services. We take pride in our engineering and design division.

Our exceptional engineering services include:

- Engineering the necessary live and dead loads
- Truss to bearing connections
- Determine size, gauge and on center spacing
- Truss bracing
- FREE design assistance

Put our expertise to work for you and see that we really earn our name...

SUPERIOR TRUSS & PANEL, INC.

Our Goal is to Keep your Project on Schedule and Within Budget

Installation Services

Ensuring the job is done right the first time, Superior Truss offers optional installation service, provided by our in-house experienced carpenters. The need for you to obtain other sub-contractors to complete the installation process is eliminated.

We can be your total manufacturer. We take pride in controlling the total process and thereby delivering on time and installing within the scheduled time allotted. Having one sub-contractor to complete the floor system achieves greater quality control.

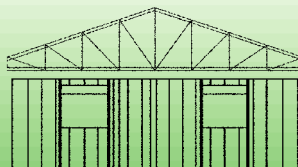

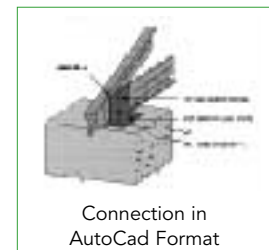

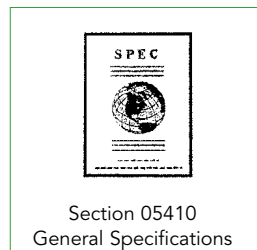

Transportation Services

From our facility to your job site, we offer only the very best. Our private fleet of trucks along with our in-house transportation team will coordinate your shipment to arrive on time. Costly shipping delays due to common carriers are eliminated. We offer 100% secure transportation to guard against damage including bending and buckling.
